Route description (as per 46 CFR 136.110)	Requested Route
---	-----------------

TOWING VESSEL PARTICULARS

Rivers: River, canal, or other similar body of water designated by the cognizant OCMI.								
Lakes, Bays & Sounds: Lake other than the Great Lakes, a bay, a sound, such other similar waters as may be designated by the cognizant Coast Guard District Commander.								
Ltd. Coastwise: Not more than 20 nautical miles from a harbor of safe refuge, as defined in this section.								
Coastwise: Not more than 20 nautical miles offshore on any ocean, Gulf of Mexico, Caribbean Sea, Bering Sea, Gulf of Alaska; or such other similar waters as may be designated by a Coast Guard District Commander.								
Great Lakes: Route on the waters of any of the Great Lakes and of the St. Lawrence River as far east as a straight line drawn from Cap de Rosiers to West Point, Anticosti Island, and west of a line along the 63rd meridian from Anticosti Island to the north shore of the St. Lawrence River.								
Ocean: More than 20 nautical miles offshore on any of the following waters; any ocean, Gulf of Mexico, Caribbean Sea, Bering Sea, Gulf of Alaska, or other similar waters as may be designated by the cognizant Coast Guard District Commander.								
Watch schedule+								
Hull Inspection Interval Request								Requested
Fresh Water Insp. Interval/46 CFR 137.300(a)(2)	Hull	A vessel that is exposed to salt water not more than 6 months in any 12-month period since the last examination or initial certification must undergo a drydock and internal structural examination at least <u>once every 5 years</u> .						
Salt Water Insp. Interval/46 CFR 137.300(a)(1)	Hull	A vessel that is exposed to salt water more than 6 months in any 12-month period since the last examination or initial certification must undergo a drydock and internal structural examination at <u>least twice every 5 years, with not more than 36 months between examinations</u> .						
MTSA applicability (date of last MTSA Verification):
